

The **LIINES Datasets Repository** supports the [LIINES research program's](#) methodological contributions. Except where research restrictions apply, this data may be found in the text of original publications. It is now reproduced here in easy-to-download numerical formats.

- [Smart Power Grids](#): Power systems test cases repositories are aggregated, linked, mirrored and cited to their original reference.
- [Energy-Water Nexus](#): Test data from recent publications in this application domain.
- [Electrified Transportation Systems](#): Test data from recent publications in this application domain.
- [Industrial Energy Management](#): Production system data that may be applied in reconfigurability, resilience, and demand side management studies.

The **LIINES** is also happy to host, link, mirror & cite other public datasets in these applications domains. Peers and colleagues interested in this possibility may contact [Prof. Amro M. Farid](#) directly about this possibility.
